

Amendments to the Claims:

1. (Currently Amended) A portable electronic device, comprising:
 - a. a display, wherein the display is visible to a user; and
 - b. a power source;wherein the portable electronic device presents safety information ~~pertaining to the power source~~ on the display indicating that the power source should not be disposed in fire.
2. (Original) The device of claim 1, wherein the safety information is presented on the display when the device is turned on.
3. (Original) The device of claim 1, wherein the device is capable of detecting whether the power source has been decoupled since the device was turned off.
4. (Original) The device of claim 3, wherein the presentation of safety information occurs when the following have occurred:
 - a. the power source has been decoupled since the device was turned off; and
 - b. the device is turned on.
5. (Original) The device of claim 2 or claim 3, wherein the safety information remains visible on the display until a user inputs information into the device.

6. (Original) The device of claim 5, wherein the inputted information is selected from the group consisting of an acceptance of the safety information and a rejection of the safety information.
7. (Original) The device of claim 6, wherein when the inputted information comprises the rejection of the safety information, the device turns off.
8. (Original) The device of claim 1, wherein the device is capable of identifying the power source coupled thereto.
9. (Original) The device of claim 8, wherein when the power source is identified, safety information of a first type is presented on the display, further wherein the power source is not identified, safety information of a second type is presented on the display.
10. (Original) The device of claim 1, wherein the power source comprises a rechargeable battery.
11. through 30. (Canceled)

31. (New) A portable electronic device, comprising:

- a. a display, wherein the display is visible to a user; and
- b. a power source;

wherein the portable electronic device presents safety information ~~pertaining to the power source~~ on the display indicating that the power source should not be disassembled.

32. (New) A portable electronic device, comprising:

- a. a display, wherein the display is visible to a user; and
- b. a power source;

wherein the portable electronic device presents safety information ~~pertaining to the power source~~ on the display indicating that the power source may be recycled.
